Office Action Summary

Application No.

10/625,509

Applicant(s)

LEE, KANGHOON

Examiner

Gabriel I. Garcia

Art Unit

2625

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 3-20 is/are pending in the application.
- 4a) Of the above claim(s) 6-19 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 3-5 and 20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Part III DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

1. Claims 3, 4, 5 and 20 are rejected under 35 U.S.C. 103(a) as being anticipated by Yokomizo et al. (6,321,266) in view of Goldberg et al. (Desktop Teleoperation Via the World Wide Web).

With regard to claim 3, Yokomizo et al. teaches a computer program product (e.g. col. 1, lines 44-52 and col. 47, lines 29-34), comprising: a computer storage medium (e.g. col. 36, lines 53-65) and a computer program code mechanism embedded in the computer storage medium which when executed by a computer, causes a printer to perform a method for controlling a configuration of the printer (e.g. col. 32, lines 36-63, and col. 49, lines 27-39) comprising: receiving a request for a printer control interface (e.g. col. 1, lines 44-52, and col. 70, line 66 thru col. 71, line 45) from a computer remote from

Art Unit: 2625

the printer (see fig. 35); sending the printer control interface to a remote computer (e.g. col. 1, lines 44-52, col. 32, lines 36-67, and col. 38, lines 16-55); receiving a series of printer control parameters in response to sending the printer control interface (e.g. col. 1, lines 44-52, col. 19, lines 39-50, and col. 72, lines 34-67) ; and updating a control memory of the printer based on the series of printer control parameters (e.g. col. 1, lines 44-52, col. 19, lines 39-50, and col. 72, lines 34-67). Yokomizo et al. fails to teach the printer control interface in the form of a web page. However, Goldberg et al. teaches that it is well known in the art at the time of the invention to have a control interface in the form of a web page (see pages 1-6). Therefore, it would have been obvious to one of ordinary skill at the time of the invention to program the printer control interface of Yokomizo et al. with the control interface of Goldberg et al. because of the following reasons:

- 1) to allow the user(s) of the system of Yokomizo et al. to control the configuration of the printer remotely by accessing the printer through the webpage; and 2) will allow the system of Yokomizo et al. to be more versatile allowing user(s) to control the printer using the WWW.

With regard to claim 4, Yokomizo et al. further teaches comprising storing the

Art Unit: 2625

series of printer control parameters in the control memory of the printer based on an identification of the remote computer (e.g. col. 1, lines 44-52, col. 12, lines 17-25, and col. 57, lines 52-55).

With regard to claim 5, Yokomizo et al. further teaches comprising storing the series of printer control parameters in the control memory of the printer based on an Internet address of the remote computer (e.g. col. 1, lines 44-52, and col. 57, lines 39-55).

With regard to claim 20, Yokomizo et al. further teaches comprising storing the series of printer parameters in a database (e.g. col. 1, lines 44-52, col. 57, lines 39-55, and col. 76, lines 9-24).

Conclusion

2. Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gabriel I. Garcia whose telephone number is (571) 272-7434. The examiner can normally be reached on Monday-Thrusday, 7:30-6:00.

Art Unit: 2625

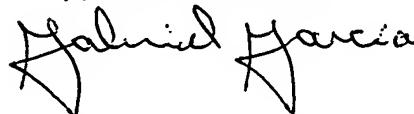

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L. Coles can be reached on (571) 272-7402. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
